

The Water Cycle

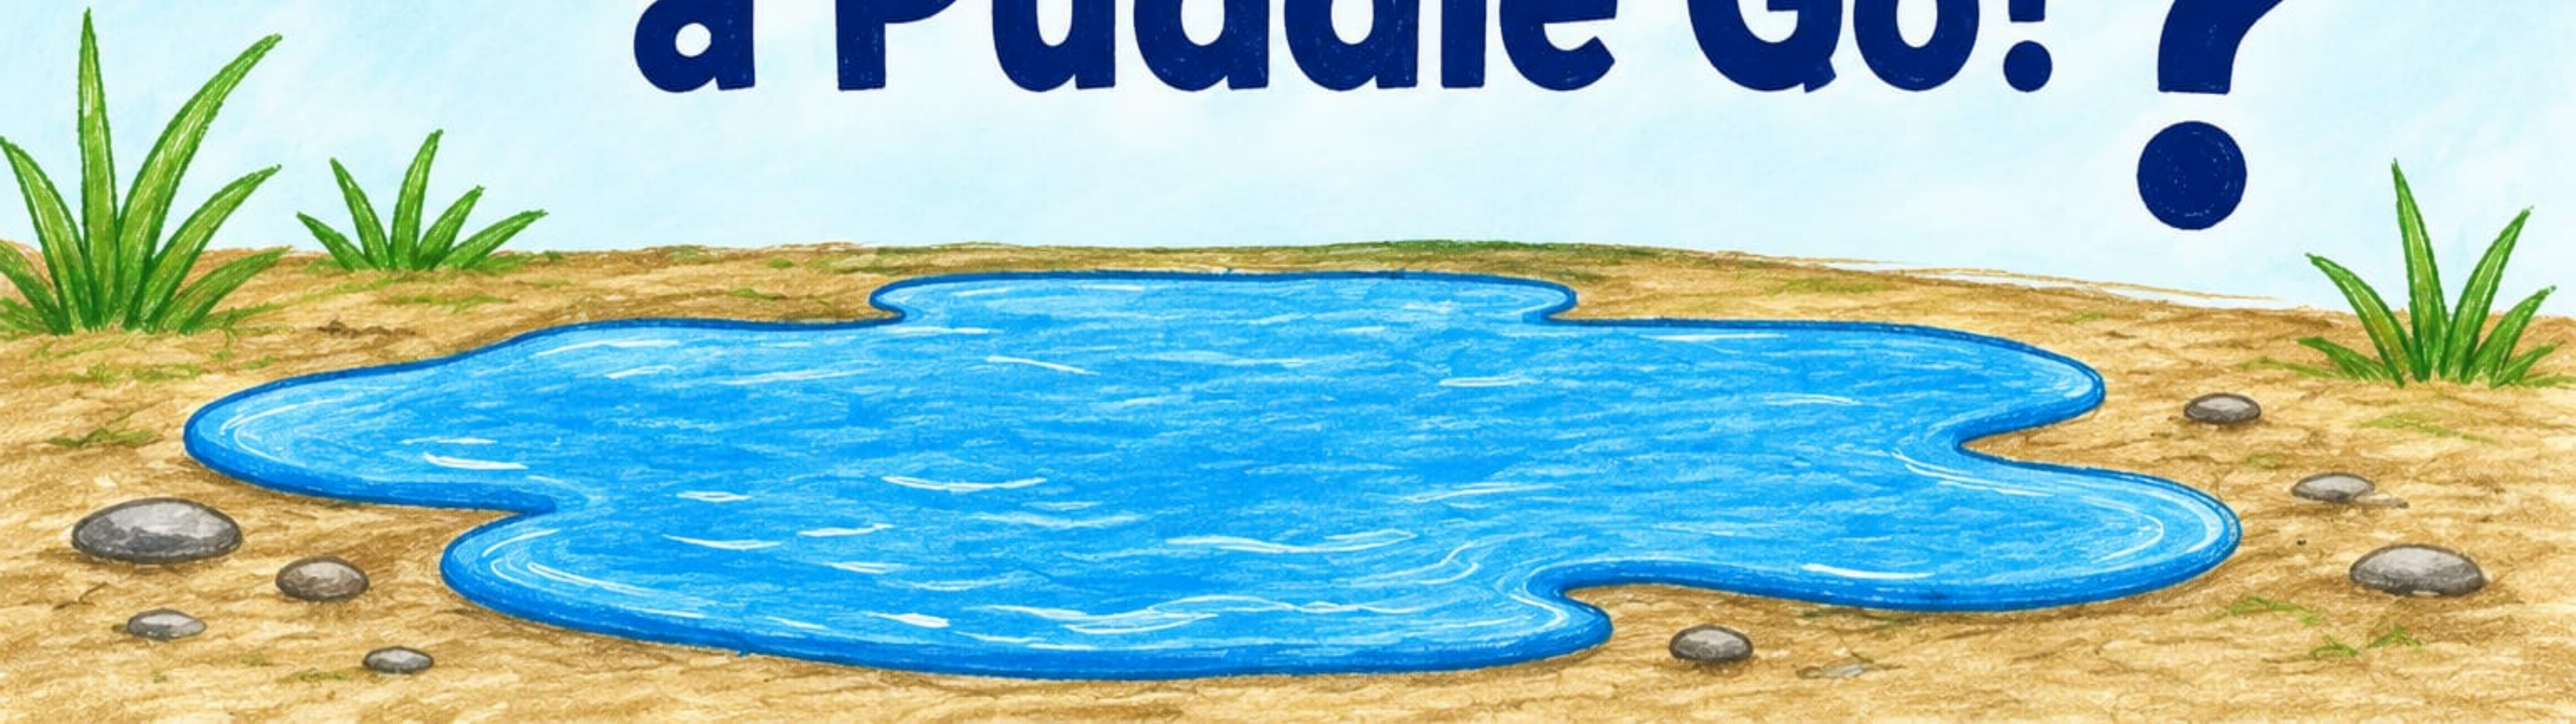

Today's Goal

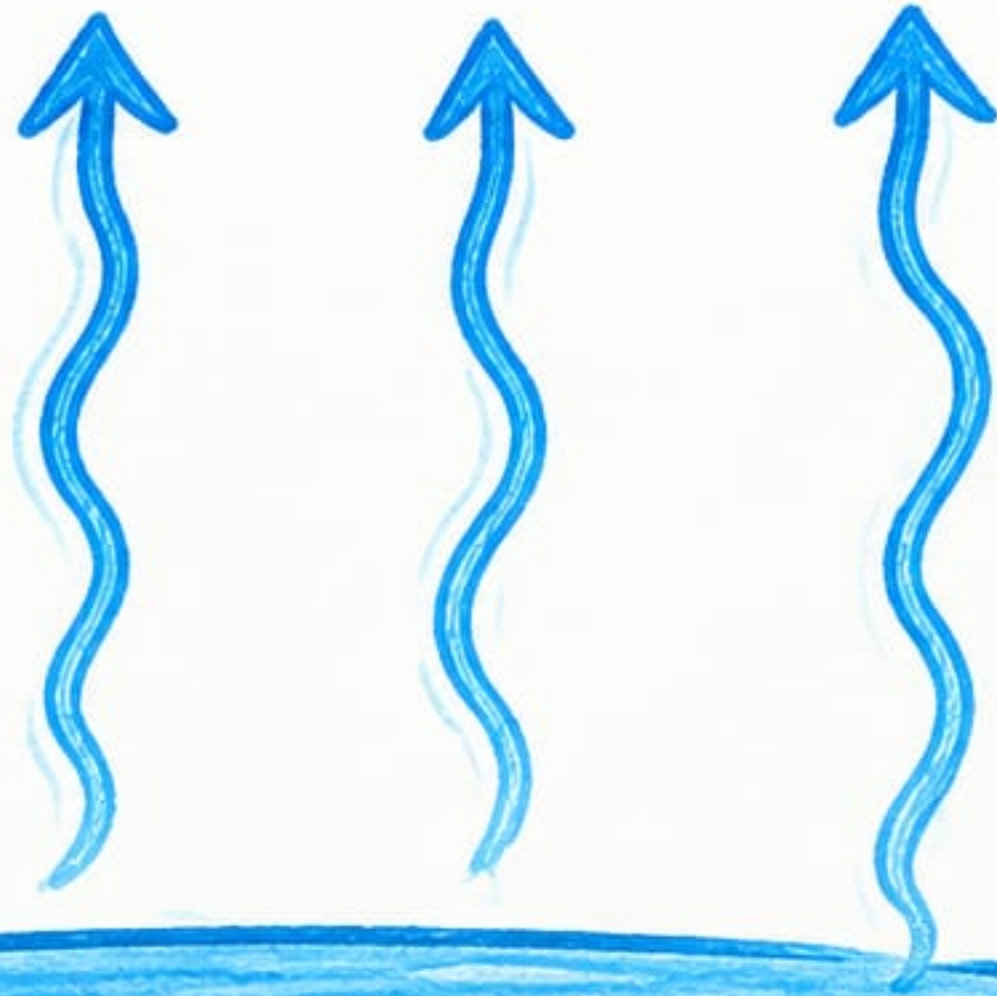

Students can say
that water moves
around Earth in a
repeating cycle.

**Where Does
a Puddle Go??**

Evaporation

**Sun warms
water. Water
vapor rises.**

Condensation

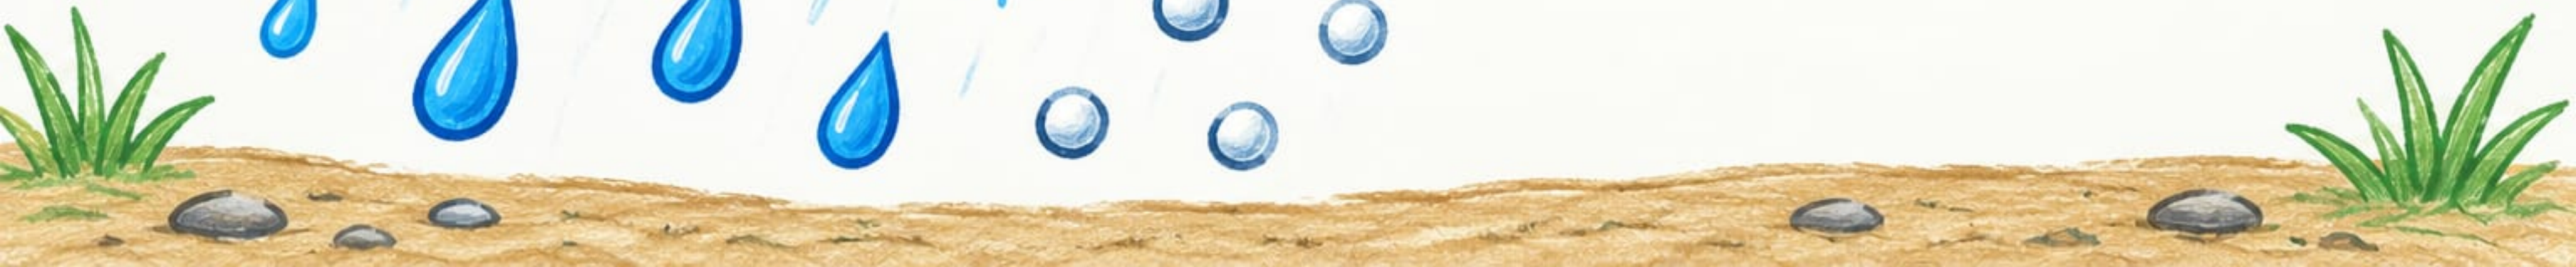

**Water vapor
cools into
tiny
droplets.**

Precipitation

**Water falls
as rain, snow,
sleet, or hail.**

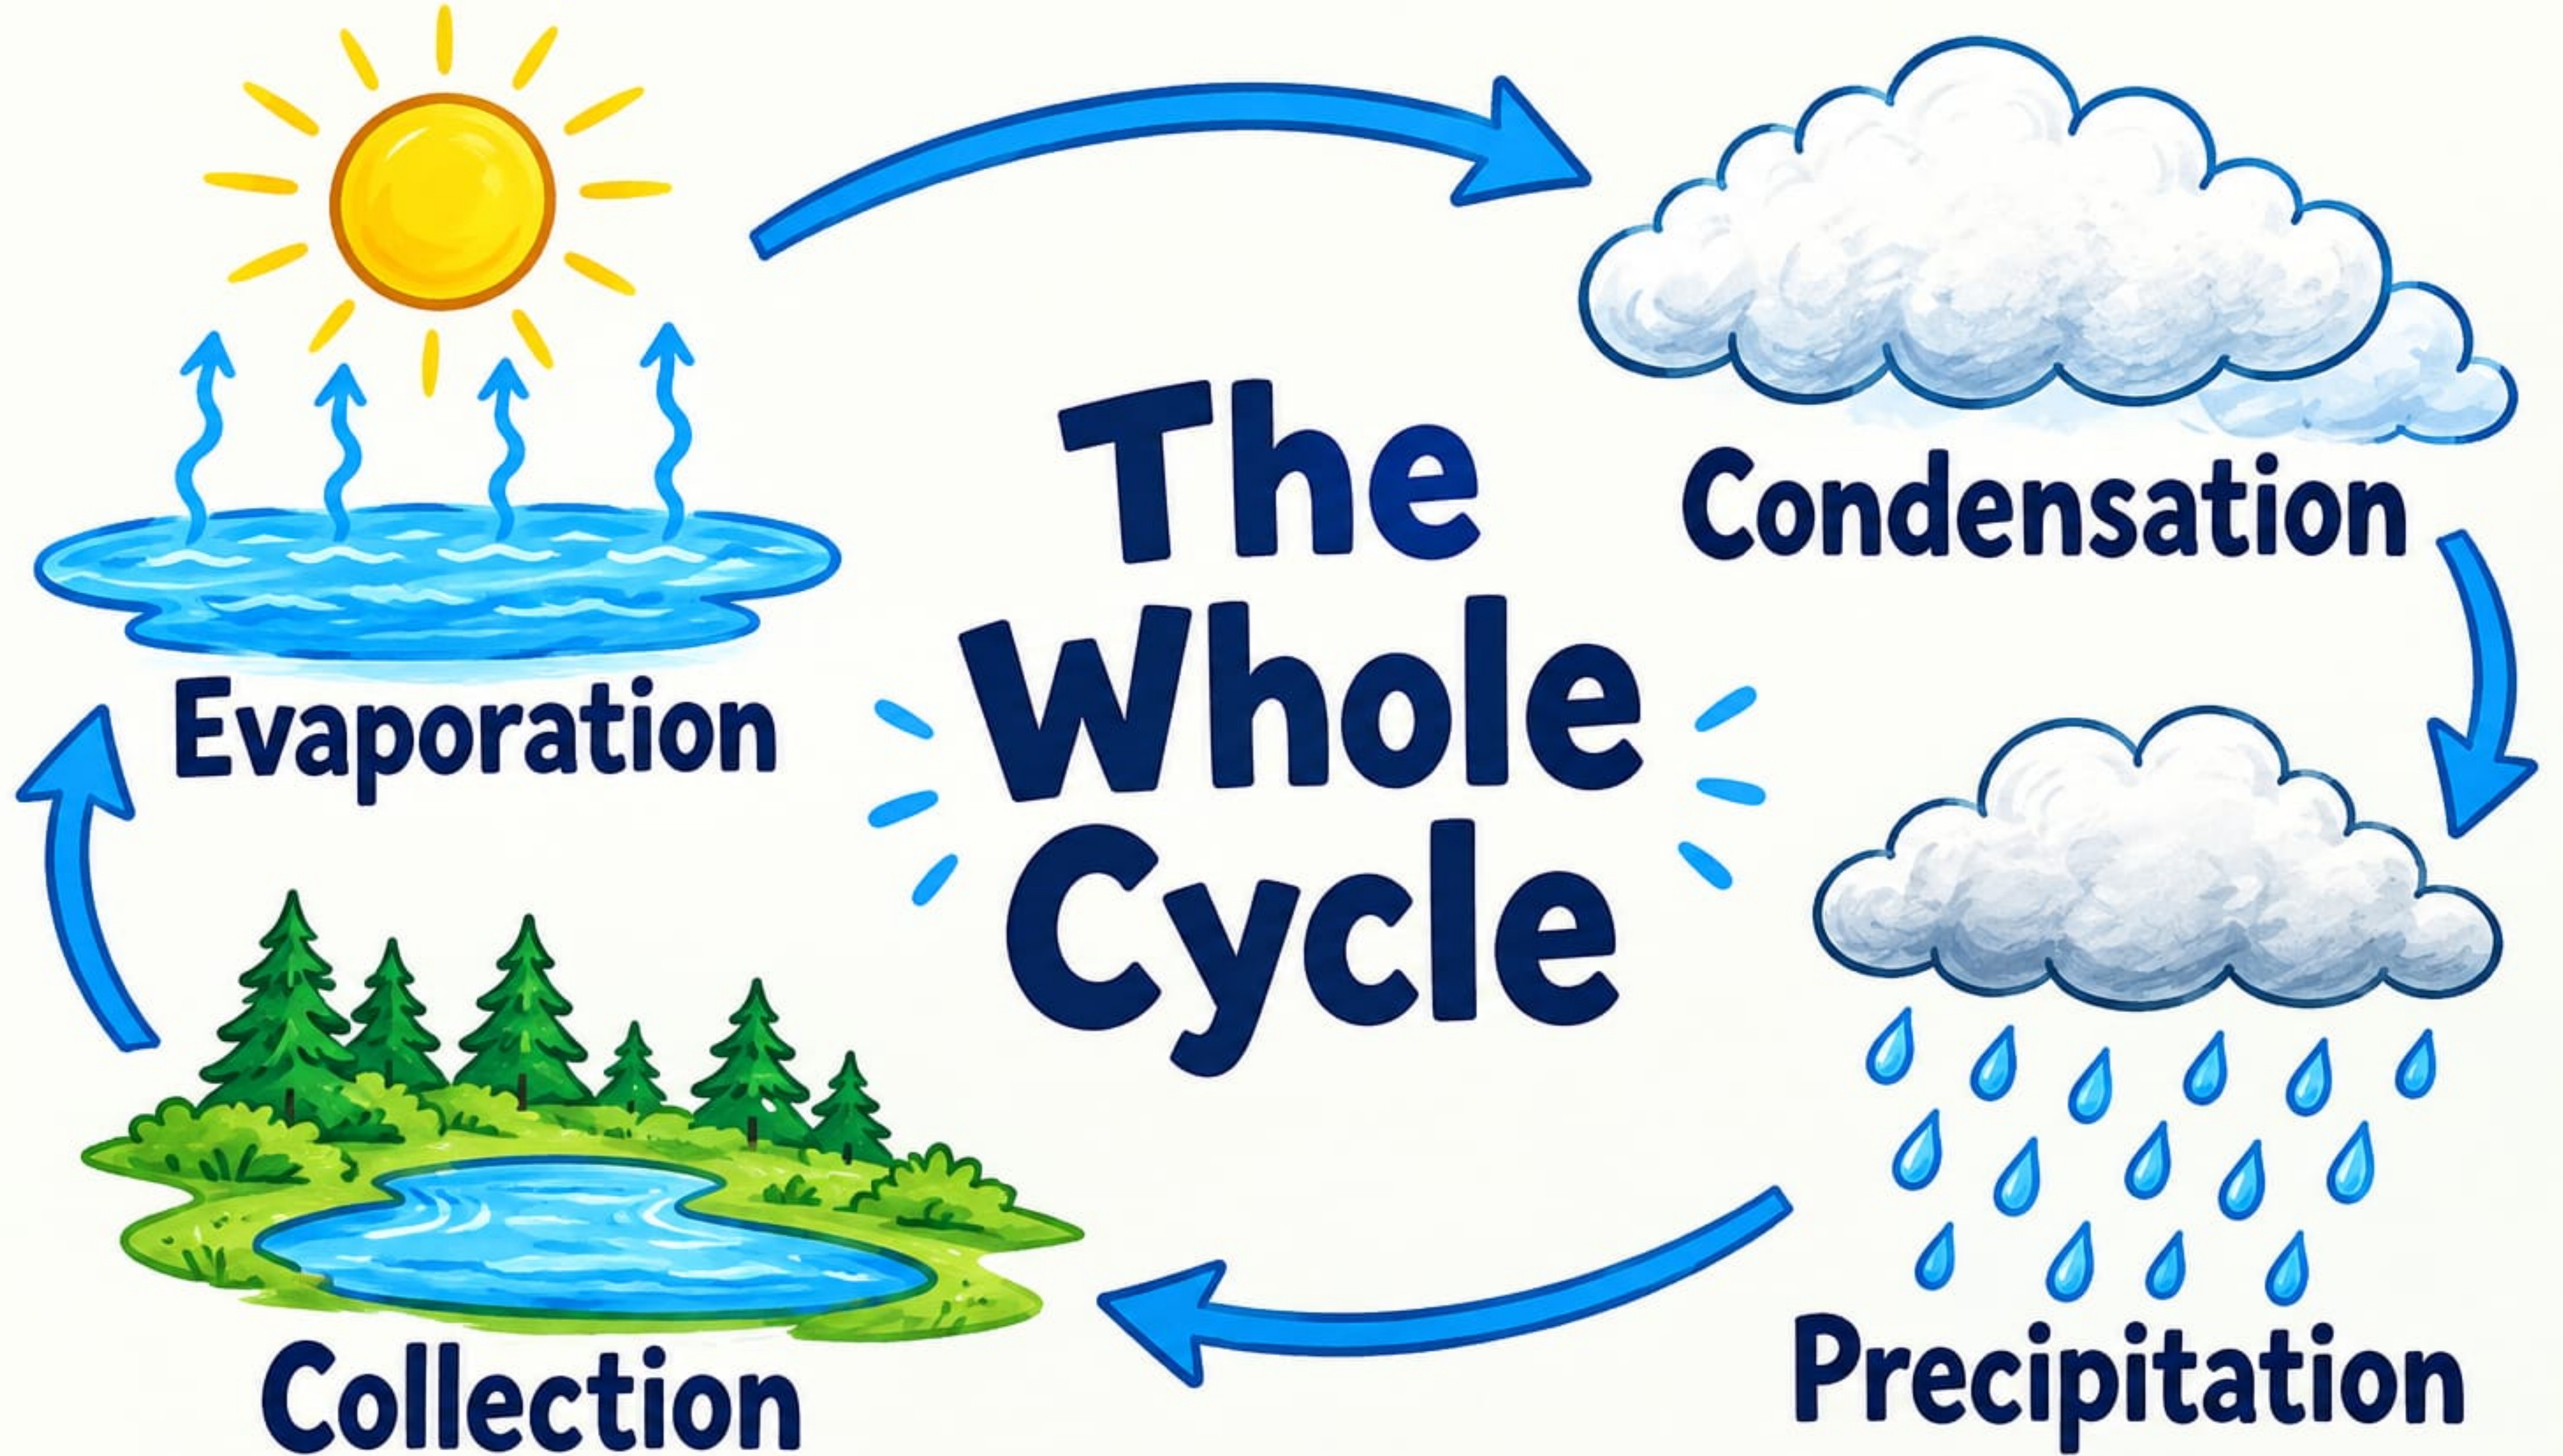

Collection

**Water gathers
in rivers, lakes, and
oceans.**

1.

What warms water?

2.

What forms clouds?

3.

Where does rain collect?

Exit Ticket

**Tell how water moves
through the cycle.**
